EDUCATION:

B.Tech in Information Technology

Sep. 2021 – May 2025

APJ Abdul Kalam Technical University, Lucknow, Uttar Pradesh

CGPA: 7.6/10

TECHNICAL SKILLS & SOFT SKILL

- **Languages:** JavaScript, Core Java, SQL
- **Frameworks:** React, Express.js, MVC
- **Databases:** MySQL, MongoDB
- **Tools:** Git, GitHub, Postman, VS Code, Cursor.AI
- **Others:** RESTful APIs, JSON, Redux
- **Operating Systems:** Windows, Mac
- **AI:** ChatGPT, Gemini, Cursor.AI
- **Soft Skill:** Communication, Problem-solving, Teamwork, Time Management

INTERNSHIP:

Web Development Intern

March 2024 – May 2024

- I had the privilege of working under the guidance of Mr. Shivanshu Dwivedi. This experience provided me with valuable exposure to the fundamentals of web development. Successfully implemented a fully functional project under mentorship.
- Collaborated with cross-functional teams to integrate real-time drone data visualizations into web interfaces, enhancing user engagement by 20%.

CERTIFICATION:

Web Development (MERN)

Dec 2023 – May 2024

- Mentored by Ms. Shradha Khapra, gained 6 months of MERN stack development experience, working on front-end and back-end technologies.
- Developed three full-stack web applications using MERN stack (MongoDB, Express.js, React, Node.js), improving user engagement by 30%.
- Optimized database queries, reducing query execution time by 25% and improving API response time.
- Enhanced problem-solving skills by troubleshooting and resolving complex issues during real-time project development.

PROJECTS

Uber Project (MERN) | [GitHub Repository](#)

Dec 2024 - April 2025

- Developing a Uber clone app using the MERN stack to manage captain, users, and their profiles.
- I will Integrate User profile management and real-time updates, ensuring an efficient and user-friendly experience.

User Registration Form (MERN) | [GitHub Repository](#)

Aug 2024 - Oct 2024

- Developed a secure and efficient user registration system using MongoDB, Express.js, React, and Node.js.
- Implemented JWT-based authentication and password hashing for security.
- Created a responsive UI with real-time form validation.
- Optimized API calls to reduce server response time and enhance user experience.

Property Rental Project (MVC, EJS format) | [GitHub Repository](#) | [Live Link](#)

Jun 2024 - July 2024

- Built an innovative flat rental application using the MERN stack that allowed for real-time updates of listings and bookings, ultimately enhancing platform reliability and increasing engagement by 60%.
- Integrated tenant profile management and real-time updates, ensuring an efficient and user-friendly experience.
- Employed RESTful APIs to ensure smooth communication... between front-end and backend.
